PROFESSIONAL EXPERIENCE

May 2015 - present *Independent Data Scientist/Software Developer*

I analyze data for organizations/companies, prepare reports, both static (for example pdf, excel or other formats) and automatic/dynamic as web application. I also create and manage data bases.

May 2015 - present *Oxfam Intermón, Unidad de Monitoreo y evaluación de Campañas, Barcelona, Spain*

Voluntary work creating web application that analyzes and visualizes Oxfam Intermón campaigns on Twitter. It access twitter API and store relevant information in data base. At the moment it provides different statistics like reach, audience etc. together with different visualization like histograms, graph of connections, maps showing where participants come from etc. It exports data to csv and automatically produces periodic reports in pdf.

January 2015 - April 2014 *Clacktion Barcelona, Spain*

Creating Search Engine Marketing (SEM) Campaigns, developing software for reporting, automatic control and creation of large online marketing campaigns.

2013-2014 *Soluciones de Gestión y Apoyo a Empresas S.L, Zaragoza, Spain*

Mathematical modelling in electric engineering, developing applications, writing and typesetting for engineering journal "Soluções".
